GitLab   Website

Jacopo Beschi

Software engineer

Via Don Lino Bonomelli, 24 Montichiari 25018 (BS) Italy

I'm a passionate software developer with 8+ years of experience in the field. I've worked with various technologies in the past but currently I spend most of my time working with Ruby / Ruby on Rails.
I always strive to pick the best tool for the job, embrace automatic testing and static analysis tools.
I'm an active learner on a day to day basis and like getting out of my comfort zone.
I take ownership of the work and consider customers as key for success.
I've experience in leading a small team of developers, performing code reviews and participating in software design decisions.

I'm also a Gitlab Core Team member and OSS contributor (more than 140 merged MRs). One remarkable MR that I've completed recently is Notifications for when pipelines are fixed.

Working experience

Actual position (May 2017-today)
Senior Software Engineer, Technical Lead @iubenda
Remote

Some of the remarkable tasks which I've accomplished are:
- Built from scratch a new product: the Terms and conditions generator, which **increased the company revenue by 15%**
- Migrated the development workflow from git-flow to github PR workflow
- Setup CI and static analysis tools in the main projects

My day to day workflow is made of:
- Code reviewing, making sure we keep the code quality high
- Designing and developing new features
- Participating in new candidates assessment
- Specifying tasks and interacting with both product and development team

Tech: Ruby, Ruby on Rails, JavaScript

Actual position (Jan 2018-today)
GitLab Core Team member @GitLab.inc
Remote

I started contributing to Gitlab in late 2016. Currently I made more than 140 merged MRs.
I've worked on bug fixes and new features in various parts of the application: *backend, frontend, api, quality*.

Tech: Ruby, Ruby on Rails, Golang

Nov 2014 – May 2017
Ruby on Rails / C# .NET / AngularJS full stack developer @intersail engineering
Brescia, Italy

Built web applications for external customers. Projects on which I've worked on are:

- Internal monitoring system with heartbeat concepts (Ruby, Ruby on Rails, AngularJs)
- Shopping Center management application with rich graph data (Ruby on Rails, AngularJs)
- Software to handle newborns in Italy (C#, Ruby on Rails)
- Web interface for a medical device which renders ECG data (Ruby on Rails, AngularJs)
- Document management tool (Ruby on Rails, Easticsearch)

Tech: Ruby, Ruby on Rails, C#, JavaScript, AngularJS

May 2013 – Nov 2014
Web developer @palmabit
Brescia, Italy

Built web application for external customers, mainly using PHP and Laravel Framework.

Tech: PHP, Laravel Framework, JavaScript, AngularJS

Education

2013 Master degree in IT Engineering at the University of Brescia

2010 Bachelor degree in IT Engineering at the University of Brescia
